💼 Professional Experience

CoDev, *Full Stack C# Developer* 🔗   Jul 2021 – present | Cebu, Philippines

- Worked with different kinds of technologies such as Angular, .Net Core, Entity Framework, T-SQL, Expo, ReactNative, Android, iOS, and Azure.
- Enabled mobile access for HID readers by ejecting an Expo app to implement and integrate a third party SDK in both iOS and Android, exposing the functionality to React Native using React Native Modules.
- Improved startup efficiency by up to 25% for their user-facing application by optimizing the Angular NgRx store and RxJs.
- Worked with the CTO and Senior Architect in conceptualization, design, and development to build several user-facing and maintainable features using Angular, .Net Core, and Entity Framework Core migrations.
- Implemented optimizations for client-side image caching in Angular, which improved loading times by 60%.
- Modernized the UI UX of the older features using SCSS.

Accenture, *Application Developer* 🔗   Apr 2019 – Jul 2021 | Cebu, Philippines

- Received Azure Fundamentals (AZ-900) certification in October 2020.
- Led and implemented Azure Logic Apps to offload heavy tasks from our service which led to a significant performance boost.
- Initiated and maintained our GIT branching strategy and Continuous Integration (CI)/Continuous Development (CD) in Azure DevOps which increased our release efficiency.
- Led the team on optimizing various features due to the increase in projects which brought loading times down to 83%.
- Built an Error handling implementation in our ASP.Net APIs that reduced duplicate code throughout our service by up to 40%

Vertere, Inc, *Application Developer*   Apr 2018 – Apr 2019 | Cebu, Philippines

- Contracted for Accenture where I boot camped for Full Stack Development before working on an internal project for Accenture
- Deployed and maintained several Azure Cloud Services and Azure DevOps such as production AppServices, SendGrid, Azure Slot Deployment, GIT in DevOps.
- Built several robust and maintainable features in ASP.Net, AngularJs, and T-SQL that helped employees and project managers deal with their onboarding/offboarding more efficiently.
- Initiated and implemented various architecture optimizations, and security enhancements to follow industry-standard principles like SOLID and DRY.
